

# Freedom From Consequences Isn't Freedom

This article is from the "Edifying the Body" section of the Church of God Big Sandy's website, churchofgodbigandy.com. It was posted for the weekend of June 29, 2019. A version of the article was posted at townhall.com on June 26.

**By Ben Shapiro**

LOS ANGELES, Calif.—On Monday, Sen. Bernie Sanders, I-Vt., desperate to revive his flagging campaign, proposed a far-reaching plan to wipe out all student debt. That plan falls hard on plans by Sen. Elizabeth Warren, D-Mass., his chief far-left rival for the Democratic presidential nomination, to make college "free" moving forward.

Sanders' justification for allocating over \$1 trillion of taxpayer money to relieving relatively more well-off people from debt freely incurred: True freedom means living free of consequences.

Sanders tweeted: "Are you truly free if you graduate hundreds of thousands of dollars in debt? Are you free if you cannot pursue your dream because you don't make enough to cover your student loan payments? We will #CancelStudentDebt because there is no freedom without economic freedom."

This is an Orwellian redefinition of the term "freedom."

## **Making own decisions**

Freedom has traditionally meant the ability to make your own decisions—and to live with the consequences of those decisions.

I am free to buy a Lamborghini on credit, if Visa will extend me that credit; I am not deprived of freedom when Visa comes calling with a bill. Economic freedom amounts to the ability to make non-compelled decisions in the economic sphere.

Sanders' economic plans offer precisely the reverse.

But Sanders' rhetoric here is merely the latest in a long line of such redefinitions from the American left.

## **Roosevelt's vision**

Franklin Delano Roosevelt suggested that "true individual freedom cannot exist without economic security and independence"—and proceeded to make more Americans dependent on government than ever before in American history.

He declared "freedom from want" in January 1941, in the midst of a second Great Depression of his making—the prior year, the unemployment rate in the

United States was 14.45 percent. The mere declaration, as it turned out, did not end want.

### **Government-sponsored freedom**

And the redefinition of freedom as government-sponsored dependency did not end in prosperity or freedom.

Nonetheless, the suggestion that freedom lies in prosperity—not that freedom is the precondition for prosperity—still retains draw. That's mainly because the human heart will always embrace the notion that our shortcomings spring not from choice but from circumstance.

Sometimes that's true. But in a free country, it's far more often untrue.

### **Making demands of others**

Still, that notion relieves us of responsibility while making demands of others. After all, if freedom lies in lack of college debt, then those who demand that you pay your debts are curbing your freedom.

In reality, here's what the #CancelStudentDebt plan would do: continue to drive up the cost of college tuition, with the taxpayer footing that cost.

That's precisely what has happened in the past few decades as the feds have involved themselves in the supposedly vital task of ensuring that everyone goes to college.

### **Not needing college**

Never mind that many people don't need to go to college—that coming out of college without a skill set but with hundreds of thousands of dollars in debt is a bad bargain.

College for all became the mantra; the government stepped into the breach; costs rose. Now government once more steps into the breach.

### **Carefree doesn't mean free**

Canceling student debt may mean a more carefree life for those who voluntarily took on debt, but it means a more burdensome life for those who have paid off their debts, who didn't go to college or who haven't yet been born.

And carefree doesn't mean free. It simply means that someone else may be taking responsibility for your decisions. My children are carefree; they're certainly not free.

Going to college is often seen as an important step toward adulthood. Responsible financial decision-making is a far more important step. Disconnecting the two just continues the infantilizing of American adults. But that's all part of Sanders' agenda, isn't it?
