

Eye on the World

December 27, 2025

This compilation of material for “Eye on the World” is presented as a service to the Churches of God. The views stated in the material are those of the writers or sources quoted by the writers, and do not necessarily reflect the views of the members of the Church of God Big Sandy. The following articles were posted at churchofgodbigandy.com for the weekend of Dec. 27, 2025.

Compiled by Dave Havir

Luke 21:34-36—“But take heed to yourselves, lest your souls be weighed down with self-indulgence, and drunkenness, or the anxieties of this life, and that day come on you suddenly, like a falling trap; for it will come on all dwellers on the face of the whole earth. But beware of slumbering; and every moment pray that you may be fully strengthened to escape from all these coming evils, and to take your stand in the presence of the Son of Man” (Weymouth New Testament).

An article by Mick Hume titled “Europeans May Not Love Trump – but Many Agree With Him” was posted at europeanconservative.com on Dec. 15, 2025. Following are excerpts of the article.

There has been much weeping, wailing and gnashing of teeth in response to U.S. President Donald Trump’s recent scathing criticisms of Europe’s “weak” leaders and the danger of “civilizational erasure” on the continent.

Trump has been branded anti-European. But if that was true, then surely millions of European citizens must also be considered “anti-European.” Because they are voting for political parties and supporting protest movements which make strikingly similar criticisms of the EU regime.

- Contrary to the impression given in Brussels, the people of Europe do not need any malign American interference to turn them against their leaders.
- They can see for themselves that national sovereignty, democracy and free speech are under attack from the EU center, and that uncontrolled immigration is transforming their societies for the worse.
- That’s why people across Europe have been voting in increasing numbers for insurgent national conservative parties – not because of what Trump or anybody else says, but because of what their rulers have done to European society, culture and civilization.

Turning to the terrible war in Ukraine, Trump was equally dismissive of posturing European leaders who claim to be championing Ukraine: “They talk, but they don’t produce, and the war

just keeps going on and on.”

President Trump’s more idiotic critics in America and Europe like to accuse him of ruling like “a King” – ignoring the fact that (unlike many of the most powerful people in Brussels), he was democratically elected with a mandate to implement the very politics he is pursuing.

In this instance, “King” Donald looks rather more like the truth-telling boy in the Hans Christian Andersen fairy tale, who says what everybody can see and shouts out that the Emperor has no clothes. In publicly exposing the dangerous ideologies and actions of the European elites, he has given a presidential voice to what many rank-and-file voters are thinking.

There is no doubt that Europe’s political elites genuinely despise the populist Trump, who has disrupted their cozy world and showed up their globalist worldview as outdated fantasy. They also, of course, secretly relish the chance that opposing Trump gives them to pose as defenders of Europe against U.S. imperialism.

European peoples’ attitude to Trump is more complex. True, he would not win many elections this side of the Atlantic. But whatever they think of him personally, many instinctively agree with Trump’s political attitude to issues such as mass migration and national sovereignty.

According to one new opinion poll that made mainstream headlines, nearly half of Europeans see Trump as “an enemy of Europe.” But notice the wide range.

- Belgium – 62%
- France – 57%
- Croatia – 37%
- Poland – 19%
- The pollsters did not bother to ask the people of Hungary or other nations further East.

Notice some numbers to a December YouGov poll – comparing unfavorable to favorable.

- Denmark – 91% unfavorable and 6% favorable.
- Spain – 80% unfavorable and 16% favorable.
- Germany – 79% unfavorable and 17% favorable.
- UK – 72% unfavorable and 22% favorable.
- France – 64% unfavorable and 18% favorable.
- Italy – 64% unfavorable and 28% favorable.

Yet, whether they like him or not, many European voters also seem essentially to agree with Trump’s point that European leaders are “weak” and that the continent is “decaying” economically and culturally.

That is surely why (according to a major Politico poll), voters in big European nations who view Trump unfavorably still see his re-election in Washington as more significant for their countries than the election of their own national leaders.

- UK – 54% thought Trump’s re-election meant more than the election of Keir Starmer.
- Germany – 53% thought Trump’s re-election meant more than Friedrich Merz.
- France – 43% thought Trump’s re-election meant more than Emmanuel Macron.

They recognize that Trump is changing the world order. Being linked to Trump has not damaged the political success of national conservative leaders.

- Italy – Prime Minister Giorgia Meloni.
- Hungary – Prime Minister Viktor Orban.
- UK – Nigel Farage

The truth is that Donald Trump is neither the cause of Europe’s problems nor the solution.

Europe must resolve its own civilizational crisis. But that will not be possible while it is ruled by an EU elite that does not believe in the democratic civilization it claims to lead.

An article by Auguste Meyrat titled “The Socialist Spell: Why Modern Minds Keep Falling for an Old Lie” was posted at theblaze.com on Dec. 20, 2025. Following is the article.

What draws people to socialism?

Even after nearly two centuries of ruin brought to those societies that have adopted this governing system, the appeal still remains. Most Western countries have a thriving socialist party occupying portions of the government – including the United States with the Democratic Socialists of America.

Worse still, the DSA experienced a huge win in New York City with the election of outspoken socialist Zohran Mamdani and came close to beating the Republican candidate with another socialist in a special election in Tennessee in December.

Then, of course, there are the legions of leftists online content creators indoctrinating millions of or users with socialist messaging.

- Is it historical ignorance with the Cold War increasingly far behind us?
- Is it the leftist teachers simply passing over the horrific genocides of communist leaders like Mao Zedong, Joseph Stalin, or Pol Pot?
- Is it the leftist teachers ignoring the ongoing calamities of Cuba, Venezuela, North Korea and other socialist backwaters?

- Is it simply the promise of free stuff?
- Is it the envy of billionaire elites who seem to wield omnipotent power?

The socialist paradox

No doubt – ignorance, greed, envy and boredom all play a significant role in the elevation of socialists.

This is why most opponents of socialism generally push back by attempting to teach people about the endless failures of socialism, the basic laws of economics, and the immorality and destructiveness of confiscating property and denying citizens their constitutional freedoms.

Clearly, this approach has not been successful with this latest crop of socialists who now make up large portions of the Millennial and Gen Z cohorts.

It could just be that human nature is such that it is always vulnerable to toxic ideas like socialism, and digital technology has made this problem even more challenging. After all, the promises of socialists made in today's media landscape are closely analogous to the serpent's promises in the Garden of Eden: Do this one thing (i.e., eat this fruit, vote and campaign for this socialist) and you will have everything you want.

Or, more likely, it could be that conservatives are misunderstanding the issue altogether.

Rather than view socialism as an ideology, a movement, or a moral failing inherent in human nature, it would be better to see socialism as a reaction to all these things.

At its core, socialism is what happens when a person consciously rejects political reasoning, morality, and complex abstractions – all in favor of a strictly materialist and existentialist approach to life.

Orwell and the socialist mind

An illustration of this phenomenon comes from the great 20th century writer George Orwell – who unintentionally captures the socialist mind in his personal account of the Spanish Civil War, “Homage to Catalonia.”

Despite being known as a fierce critic of totalitarian surveillance states like the Soviet Union, Orwell himself was an ardent socialist throughout his life. In fact, he went to Catalonia to fight a war on behalf of the Trotskyist Workers' Party of Marxist Unification.

His stated goal was not necessarily to write a full account of the Spanish Civil War (though he did), but first and foremost to kill fascists.

What is most surprising about “Homage to Catalonia” is just how little Orwell actually writes about socialism itself. He spends many pages describing the size of rats, the scarcity of tobacco, and the convoluted squabbling between various anarchists, communists, and socialist factions – yet almost nothing about why he is actually fighting in a foreign civil war.

In one of the middle chapters (almost in passing), he devotes a precious few paragraphs on the matter – citing his sympathy with the laborers in their hope of realizing true equality: “The thing that attracts ordinary men to Socialism and makes them willing to risk their skins for it, the ‘mystique’ of Socialism, is the idea of equality; to the vast majority of people Socialism means a classless society, or it means nothing at all.”

Sadly, Orwell quickly follows this reflection with the immediate reality of his situation: “I was hardly conscious of the changes that were occurring in my own mind. Like everyone about me, I was chiefly conscious of boredom, heat, cold, dirt, lice, privation, and occasional danger.”

Naturally, these concerns are what make up the bulk of his book.

At no point in Orwell’s narrative does his joy rise above the creature comforts of cigarettes, wine, food, sleep, and personal cleanliness, nor does his sorrow go much beyond the deprivation thereof. Any hope he might have that transcends this narrow worldview – i.e., virtue, ethics, greater truth, life after death (Orwell survives a shot through the neck), or even winning the war – is completely absent.

Orwell is just there, living his life and fighting an enemy. Even though he is aware of the atrocities of the socialist militia (like destroying churches and killing innocent priests and nuns), he hardly thinks about it. Even though he throws a bomb into enemy lines and inflicts a slow and painful death on a fascist soldier, he is more annoyed at the man’s screaming than he is perturbed at the fact that he just killed a man in cold blood for a dubious cause.

Obviously, Orwell was not too dim-witted to think of these matters, nor is it because he was some kind of true believer blinded by misleading propaganda, nor was he a socialpath.

Instead, he has committed to a mode of behavior and thought that negates all moral rationality. His socialism simply does not touch on anything beyond the following.

- The next meal
- The next bus to work
- The next cup of coffee
- The next nice-sounding idea.

Acting as a socialist only means doing what the other socialists seem to be doing – whether that means joining a protest, fighting in a civil war, or voting for a DSA candidate.

Although some of this mode of behavior betrays a deep streak of nihilism, the socialists

themselves never reflect on anything long enough to realize it. For all the observations Orwell makes (with his characteristic wryness), none of it ever leads to a deeper conclusion about his situation.

Much of his general attitude could be summed up with the empty platitude: “It is what it is.”

Readers can also find this kind of hopeless shrug in the endings of Orwell’s novels “Animal Farm” and “1984” – where the antagonists triumph and all the efforts of the protagonists prove to be futile as well as pointless.

Based on the account given in “Homage to Catalonia,” the biggest precondition that leads to this mindlessness is modernity’s systemic atomization and subsequent loneliness.

Throughout his narrative, Orwell has no real friends about which to speak – yet he does somehow drag his wife to Barcelona while he fights with the Workers’ Party of Marxist Unification.

True, he notes with fondness how everyone addresses each other as “comrade,” as well as substituting the formal “usted” (Spanish for “you”) for the informal “tu.”

Yet, this belies the indifference he ultimately has for these men suffering and dying senselessly. This community of soldiers in the trenches (the one example that Orwell can point to as true socialism in practice) is almost entirely superficial. Years later, he still cannot see this and even feels glad for the experience of stinking and starving in trenches with his socialist “comrades” for so many months.

Humanize before you catechize

In light of all this, it should be clear that mere apologetics for free-market capitalism, liberal democratic republicanism, and Christian communitarianism will fall on deaf ears – for the socialists both then and now.

A catchy slogan, a photogenic demagogue, an attractive vibe will win over otherwise intelligent people and lead them down a dark path that allows not light to come in.

In order to bring them back from this path, conservatives and other anti-socialists need to appreciate the content of their worldview (or lack thereof) along with the modern context of today’s postmodern consumerist culture that have made friendship, depth, and moments of quiet reflection next to impossible.

Once they recognize this, they will finally understand that more education and fewer affordability crises will not fix the problem of socialism’s growing popularity. Instead, they will have to meaningfully connect with these people, pull them away from the sources of malaise, and patiently fill up what has been hollowed out.

People must be humanized before they are catechized.

Even though this is a much bigger project, it is a more effective and fulfilling one. One can speculate what would have happened if Orwell found religion and joined a church instead of finding socialism and joining the Workers' Party of Marxist Unification. Perhaps his eventual novels criticizing Russian communism would have lacked the same insights.

Or, perhaps his cynicism and recklessness would have turned to hope and wisdom – and he could have offered a better way forward to those who under the spell of socialism instead of dreaming up horrific depictions of socialism's excesses.

“Eye on the World” comment: The following headlines involve articles that are considered international. The articles were not posted, but the headlines give the essence of the story.

U.S. and Israel – continue to spend big money on military

An article by Paul Jones titled “Five Psychological Approaches to Handling Holiday Loneliness” was posted at psytopost.org on Dec. 20, 2025. Following are excerpts from the article.

Christmas is often considered a time of connection, warmth and belonging. That’s the script, anyway. But for many people, the reality feels different; isolating, emotionally weighted and filled with comparisons that sting.

Loneliness, isn’t about the number of people around you. It’s about connection, and the absence of it.

Personality plays a role too. People high in traits such as neuroticism or socially prescribed perfectionism can be more vulnerable to distress and loneliness when life does not live up to their expectations.

Your brain on loneliness

Studies have shown that chronic loneliness can increase stress hormones such as cortisol, impair immune function and even affect cardiovascular health. Social neuroscientist John Cacioppo described loneliness as “a biological warning system” that our need for connection isn’t being met.

Loneliness, though, is a normal human response. It is a reaction to a mismatch between our desired social experience and our reality. Self-discrepancy theory helps explain why this mismatch causes emotional pain. When there’s a gap between who we are and who we feel we should be (whether it is socially, emotionally or even seasonally), discomfort follows.

Solitude isn’t the answer

That said, being alone doesn’t automatically mean something’s wrong. In fact, it might be exactly what you need.

For many, this time can be a rare opportunity for space, stillness and healing. Choosing solitude purposefully can be deeply restorative. Connecting with yourself can be just as important as connecting with others. Research into self-determination theory also highlights autonomy, competence and relatedness as core psychological needs.

Autonomy, in particular, means honoring your own choices – not other people’s expectations.

For example – choosing to spend the day quietly reading, cooking for yourself, or creating a personal ritual supports both autonomy and competence. These acts reinforce your ability to care for yourself and reduce the pressure to seek validation from others.

The key is alignment. Do what nourishes you, not what performs well on Instagram. And let the societal pressures wash over you rather than be driven by them.

So what can help?

Trying to “fix” loneliness with a to-do list isn’t the answer. These approaches are rooted in psychological and philosophical insight. They are not quick fixes.

1. Let yourself feel it (loneliness)

Loneliness hurts. It’s okay to name it. Pushing it away rarely works. Accepting and sitting with it can be the first step toward softening its grip.

2. Create micro-rituals

Small routines bring meaning and structure. Brew a particular tea. Rewatch a film that resonates. Light a candle for someone you miss. Rituals connect you to something larger, but also connect you to yourself.

3. Re-frame connection

Closeness doesn’t have to mean crowds. It might mean sending a message, joining a quiet online space or simply being present with yourself. Journaling, voice notes or reflective walks can all be forms of inward connection.

4. Celebrate your uniqueness

You are not a statistic. You don’t need to aim for the “average” mental health baseline. Your emotional life is yours alone. A little variation, a little eccentricity, these are signs of being alive.

5. Find what works for you

There is often no one right way to celebrate holidays. Honor your individuality.

Final comments

Loneliness isn’t something to be solved or suppressed. It’s a companion on the journey inward. And sometimes, the most meaningful connection we can make is with ourselves.

An article by Dr. Joel Salinas titled “I’m a Neurologist – 6 Easy Ways to Boost Your Brain Over the Holidays – Especially If You’re Lonely” was posted at nypost.com on Dec. 8, 2025. Following are excerpts of the article.

The holidays are for gathering with loved ones, sharing traditions and creating lasting memories. Social connection is important for your spirit – and your mind. Socializing benefits the brain by stimulating cognitive function and by lowering stress hormones like cortisol (which reduces inflammation and blood pressure).

Unfortunately, not everyone has a reliable circle of friends and family for the holidays.

These are six major ways to keep your spirits and your brain bright through the season, even in the absence of a strong support network.

- Start a hobby
- Fill in a puzzle
- Get your groove on (with dance classes)
- Embrace technology
- Seek like-minded people
- Make this one change over the holidays – find ways to exercise

Isaiah 55:6-11–“Seek you the Lord while He may be found, call upon Him while He is near. Let the wicked forsake his way, and the unrighteous man his thoughts; let him return to the Lord, and He will have mercy on him; and to our God, for He will abundantly pardon. ‘For My thoughts are not your thoughts, nor are your ways My ways,’ says the Lord. For as the heavens are higher than the earth, so are My ways higher than your ways, and My thoughts than your thoughts. For as the rain comes down, and the snow from heaven, and do not return there, but water the earth, and make it bring forth and bud, that it may give seed to the sower and bread to the eater, so shall My word by that goes forth from My mouth; it shall not return to Me void, but it shall accomplish what I please, and it shall prosper in the thing for which I sent it.”
